LED GREEN Technology

Leotek Launches New Grade Crossing Railroad Signal

Milpitas, CA – September 13, 2011 – Leotek Electronics USA Corp., a global pioneer in light-emitting diode (LED) technology, is proud to introduce the new Grade Crossing Railroad Signal LED module. This product is made in the United States, signifying the company's continued dedication to supporting the American Reinvestment and Recovery Act (ARRA). Two different models of the Grade Crossing Railroad Signal are available, providing both incandescent and pixilated options designed to meet the varying specifications of the rail industry.

The Grade Crossing Railroad Signal offers excellent light output and superior reliability. Both the incandescent and pixilated models meet and/or exceed safety and performance requirements of the American Railway Engineering and Maintenance-of-Way (AREMA), and Transport Canada. The robust LED modules are designed to withstand the demanding environment of the rail industry, and the UV-stabilized polycarbonate front lens is vandal resistant. The Grade Crossing Railroad Signal is backed by Leotek's industry leading 5-year warranty.

Leotek Electronics USA Corp. has been located in Silicon Valley, California since 1997. With millions of LED products installed throughout the United States, as well as on a global scale, Leotek offers a history of proven performance. It manufactures innovative LED lighting products for applications encompassing traffic and transit, street and area, commercial, and petroleum, convenience, grocery and retail stores.

Leotek is committed to developing emerging solid-state technology that offers greater longevity and environmental viability than traditional lighting sources, while reducing energy consumption and maintenance costs. Leotek, "The Leader in Electro-Optics Technology," continues to lead the next generation with LED Green Technology. For more information, please visit www.leotek.com.
