The Leotek Advantage

- Utilizing advanced technology, the IL Series ensures superior performance and reliability
- LED's contain no mercury or lead, and are environmentally friendly
- LED's provide over 50% savings reduction by reducing power consumption and maintenance costs
- LED's have a much longer life span than traditional incandescent lighting
- IL Series LED's provide an incandescent appearance, a wider viewing angle, and enhanced uniformity
- Engineered for superior thermal management
- Excellent dust and moisture resistance
- Maintains 70% of the initial lumen intensity after 100,000 hours of operation
- Industry leading five-year warranty

About Leotek

Leotek Electronics USA Corp., located in Silicon Valley, California since 1997, is globally recognized as a pioneer in light-emitting diode (LED) technology. With millions of LED products installed throughout the United States, as well as on a global scale, Leotek offers a history of proven performance. We manufacture innovative LED lighting products for applications encompassing traffic and transit, street and area, commercial, and petroleum, convenience, grocery and retail stores.

Leotek is committed to developing emerging solid-state technology that offers greater longevity and environmental viability than traditional lighting sources, while reducing energy consumption and maintenance costs. Leotek, “The Leader in Electro-Optics Technology,” continues to lead the next generation with LED Green Technology.

About PEEK Traffic BV (part of the stock exchange listed Imtech)

Our society is characterised by a notable increase in the demand for mobility. The increasing need to transport both goods and people is a result of, and a precondition for, economic growth. The safety, reliability and predictability of mobility are the most important challenges confronting road managers and transporters in the 21st century.

Peek is an ambitious European company that, based on its many years of experience and broad orientation, offers solutions for the mobility issues of today and the future. Together with our partners we are constantly working on the creation of innovative systems and new services.
