**LED GREEN** Technology

FOR IMMEDIATE RELEASE

### **Leotek LED Luminaire Selected by City of Los Angeles**

*SANTA CLARA, CALIFORNIA - October 2, 2009* - Over the next five years, as part of a joint project with the Clinton Climate Initiative, the City of Los Angeles is replacing 140,000 street lights with green, energy efficient LED technology. In the largest environmentally friendly LED lighting project ever undertaken by a city, Los Angeles anticipates \$10,000,000 in annual energy savings after the initial investment payback period.

After extensive research and testing of several different LED luminaires, Leotek's luminaire was selected as eligible to participate in a public bid issued by the City to begin the initial process of street light replacement. Leotek was the successful low bidder, and is honored to be able to participate with both the City of Los Angeles and the Clinton Climate Initiative in lighting the way to a greener LA.

#### About Leotek

Leotek Electronics USA Corp., located in Silicon Valley, California since 1997, is globally recognized as a pioneer in light-emitting diode (LED) technology. With millions of LED products installed throughout the United States, as well as on a global scale, Leotek offers a history of proven performance. We manufacture innovative LED lighting products for applications encompassing traffic and transit, street and area, commercial, and petroleum, convenience, grocery and retail stores.

Leotek is committed to developing emerging solid-state technology that offers greater longevity and environmental viability than traditional lighting sources, while reducing energy consumption and maintenance costs. Leotek, "The Leader in Electro-Optics Technology," continues to lead the next generation with LED Green Technology. For more information, please visit [www.leotek.com](http://www.leotek.com).
