Pacific Gas & Electric

Leotek LED Luminaire Qualified for Use in PG&E Rebate Program

SANTA CLARA, CA – Pacific Gas and Electric Company is leading the nation by providing rebate incentives to customers who install environmentally friendly LED streetlights. Leotek's SLN Outdoor Luminaire has been selected as eligible for participation after demonstrating qualifying capabilities in extensive research studies and testing. The rebate program offers customers two types of incentives for switching existing streetlights to energy-efficient LED technology. The first incentive allows customers who convert to LED lighting to receive a lower billing rate. The second incentive provides the customer a rebate for every LED streetlight installed.

With the possibility of 700,000 streetlights being replaced, the energy and maintenance savings potential is tremendous. Other advantages of LED streetlight technology, as presented by PG&E, include:

- **Improved night visibility due to higher color rendering, higher color temperature and increased illuminance uniformity**
- **Significantly longer lifespan**
- **Lower energy consumption**
- **Reduced maintenance costs**
- **Instant-on with no run-up or re-strike delays**
- **No mercury, lead or other known disposable hazards**
- **Lower environmental footprint**

About Leotek

At Leotek, customer service is the first priority. Established as a pioneer in solid-state Light-Emitting Diode (LED) technology since 1992, Leotek Electronics is globally recognized as a leader of the LED industry. Leotek maintains corporate operational facilities in both the United States and Taiwan. Products manufactured include LED lighting for Traffic and Transit, General Illumination and Commercial Signage. Leotek holds greater than 30% market share of America's traffic signal LED's.

In 2007, Leotek was acquired by Lite-On Technology, an innovator of the Taiwan LED/IT industry since 1975. Lite-On is the world's largest notebook adapter manufacturer, holding a 60% global market share. Among Lite-On's many LED products, photocopiers occupy a 14% market share globally. Other major products include projector power supplies, phone camera modules, keyboards, and enclosures, all of which have large global market shares.

About PG&E

Pacific Gas and Electric Company, incorporated in California in 1905, is one of the largest combination natural gas and electric utilities in the United States. Based in San Francisco, the company is a subsidiary of PG&E Corporation.

There are approximately 20,000 employees who carry out Pacific Gas and Electric Company's primary business—the transmission and delivery of energy. The company provides natural gas and electric service to approximately 15 million people throughout a 70,000-square-mile service area in northern and central California.

LEOTEK "The Leader in Electro-Optics Technology"

Leotek proudly participates in Intertek ETL Verification.

a subsidiary company of **LITEON**

With over 3 million installations, chances are you're already going green with Leotek.

Leotek LED signal modules are installed in over 30% of America's intersections.

Leotek was the recent low bidder to potentially supply 140,000 LED luminaires to the City of Los Angeles, in a green, environmentally friendly joint effort with the Clinton Climate Initiative.

And customer service is still our first priority.

Leotek appreciates your business.
